CSIT226/826 Human Computer Interaction

Week 4 Tutorial - Handout

DISCUSSION OF KEY TERMS

As a class you will discuss the key terms from week 2.

- Skeuomorphism
- Flat Design
- Attention
- Perception

CHAPTER 3 AND 4 QUESTIONS

1. What is cognition and why it is important for interaction design?
2. What is attention and what are its effects on our ability to multitask?
3. What strategies do you use to help you remember things?
4. Explain the concept of information processing.
5. What is meant by social interaction?
6. How do you start and end a conversation when (i) talking on a phone and (ii) chatting online?
7. Explain the differences between telepresence co-presence. How would you design a system for these methods of social interaction to occur?

GROUP ALLOCATION AND INITIAL MEETING

Students are to form groups as per the subject outline. At the end of the class all groups are required to give to their tutor:

1. A list of the group members
2. A group name
3. Their chosen domain option
4. Their reasons for selection of this option
